University of Essex

University of Essex Progression route with National Sun Yat-Sen University

for Bachelors in Chemistry Students

IMPATIENT FOR CHANGE? STUDY AT ESSEX.

WHY ESSEX?

Essex introduces you to people from every corner of the planet to create networks that last for life. We are a genuinely global community that lives, works and plays together. You study an internationally relevant curriculum, are encouraged to live and study abroad, become part of our diverse community, and are taught or supervised by academics whose research has global impact. We give you the best chance to complete in a global economy.

- We are ranked 26th in the UK in the Complete University Guide 2022
- We are ranked 25th in the UK for research quality (The Times and Sunday Times Good University Guide 2021)
- We ask difficult questions and provide vital insights for students who are impatient for change

Colchester Campus

Southend Campus

OUR LOCATIONS

Diverse and cosmopolitan with a population of around 180,000 people, Colchester is a great student town, offering a rich mix of bars, restaurants, theatres, and music venues. It is also the oldest recorded town in Britain with evidence of Roman settlements found all around town. Our campus is located just outside of town and offers extensive facilities and support services to ensure you achieve the most from your studies.

A traditional British holiday destination, Southend-on-Sea has evolved into a thriving cultural centre of music, theatre, comedy and cuisine – whilst retaining all of the charm you'd expect from the traditional English seaside. Our campus is located in the heart of the city and surrounded by all of its facilities.

We also offer free Data Science training to all of our students. Masters students can access this training through a new Data Science Boot Camp course available to Masters students in the social sciences and humanities who do not have a background in computer science. This course will give students the skills to analyse and interpret trends and patterns in data, something employers across all fields are increasingly looking for.
